

Basic Navigation Commands

- `pwd` – show current directory
- `ls` – list files and folders
- `ls -l` – detailed list
- `ls -a` – show hidden files
- `cd foldername` – go inside folder
- `cd ..` – go back
- `cd ~` – go to home directory

File & Folder Creation

- `mkdir foldername` – create folder
- `mkdir -p folder/subfolder` – create nested folders
- `touch file.txt` – create empty file
- `touch folder/file.txt` – create file using path

Rename & Move

- `mv oldname newname` – rename file or folder
- `mv file folder/` – move file
- `mv folder destination/` – move folder
- `mv ~/folder ~/Documents/` – move using home path

Delete Commands

- `rm file.txt` – delete file
- `rm -r folder` – delete folder
- `rmdir folder` – delete empty folder

Reading Files

- `cat file.txt` – read entire file
- `less file.txt` – read file page by page
- `head file.txt` – first 10 lines
- `tail file.txt` – last 10 lines

Writing Files

- `nano file.txt` – edit/write file
- `echo "text" > file.txt` – overwrite file
- `echo "text" >> file.txt` – append to file
- `cat > file.txt` – write manually (Ctrl+D to save)

Permissions Basics

- `r` = read (4)

- w = write (2)
- x = execute (1)
- User (u), Group (g), Others (o)

chmod Commands

- chmod 444 file.txt – read only
- chmod 644 file.txt – user read/write
- chmod 600 file.txt – owner only
- chmod 777 file.txt – full permission (demo only)
- ls -l file.txt – check permission

Directory Permissions

- chmod 555 folder – enter but cannot create files
- chmod 755 folder – normal directory permission
- ls -ld folder – check folder permission
